

Prof. K. HARIHARAN

Born on the 15th February 1953 of the greatest master mind of astrology of international repute Jothida Mannan Jyotish Marthand Prof. K.S. Krishnamurti, Sri. K. Hariharan had his university education in the City of Madras.

A chip of the old block as he is, no wonder he imbibed the intellect and acumen of his late father and fathomed deep in the ocean of astrological research quite early in his career.

He took to the teaching and practicing of astrology with a view to enriching its usefulness in India as well as other regions of the world. soon after the demise of the late Prof. Krishnamurti Sri. Hariharan had to shoulder onerous duties of his family in addition to business. Accordingly, he became a partner and co-editor of the illustrious magazine Astrology and Athrishta from 1972 wherein he contributed scholarly articles also. Side by side he continued to direct activities at the K.P. Stellar Astrological Research Institute engaged in fruitful astrological research and investigation carrying on the lofty mission and passion of the astrological wizard of the world. In addition to this Sri Hariharan is continuing to enrich the world of astrology by propagating it on sound rationale and precise way as his father did through his correspondence courses in English, Hindi, Tamil and other regional languages of the country, and has taken regular teaching classes from 4th Dec. 1981. In the same way as his illustrious father he continued to publish the best astrological literature in English, Tamil, Hindi, Telugu, Marathi, Japanesh, French. He had been conducting every year Asian Astrologers Meet on 1st Nov. at Chennai from 1991. He had been conducting workshops at various places from 2005 onwards.

Sri Hariharan goes by the dictum that “nature knows no pause in progress and development and the knowledge given by god’s gift in trust must be put in circulation for the good of mankind”.

Prof. K.S. Krishnamurti
Born 1-1-1908 Died : 30-3-1972

A book lover, like the king Swan, is discriminate in choosing his books. And good books, they say, are those that are opened with expectation and closed with profit. If you are looking for such books in Astrology, surely you have them in KRISHNAMURTI PADHDHATI. Readers I to VI. Krishnamurti Padhdhati was previously printed in two volumes covering about 950 pages. The materials therein included research upto 1964. After 1964, Sothida Mannan, Jyothish Marthand Prof. K.S. Krishnamurti had been conducting regular classes all over India as the President of the Stellar Astrological Research Institute and Visiting Professor of Astrology, Bharatiya Vidya Bhavan, Mumbai, Delhi, Chennai and other kendras, and highly qualified students, scholars and professional astrologers were attending these lectures and many of them have extolled KRISHNAMURTI PADHDHATI and confirmed its findings. They have contributed a great deal to further improvements in Krishnamurti Padhdhati, rendering it highly accurate and useful. The fruits of research carried out after the publication of the first edition of Krishnamurti Padhdhati (in two volumes) have been included in the new series titled as Reader I, Reader II, Reader III, Reader IV, Reader V and Reader VI.

The Science of Stellar Astrology has been lucidly and exhaustively explained in these Readers with concrete examples. Forty five years of study, research and experience of the author have gone into their preparation, rendering krishnamurti Padhdhati a complete and perfect system of predictive astrology.

If your aim is to master astrology and become a good astrologer amateur or professional - the Stellar Readers show you the way.

Now the Aquarian Age is fast approaching. But an Aquarian Star has risen in the East (in Indian Soil). He is our Revered Guruji Sothida Mannan, Jyothish Marthand Prof. K.S. Krishnamurti, who has digested Hindu & Western Literature upon this subject thoroughly. Through his deep research and vast experience extended to 40 years, he found that the Predictive Principles enumerated in these books are general and they miserably failed and failed. So most of the traditional astrologers have contributed sufficient to ridicule the fair name of Astrology - the science of sciences. But Prof. K.S. Krishnamurti has laboured much to make Astrology as perfect a science as Astronomy itself. By Lord Uchishta Mahaganapathi's grace his 40 years of deep research bore fruit and he had devised an infalliable formula to give 100% accurate precise predictions universally applicable to any type of Horoscope. Natal/Horary/Annual. This formula is popularity known as K.P.- A REAL GEM STONE AMONG THE STONES. If K.P. is followed strictly, predictions are 100% accurate. Detectors such as 'likely', 'Probably' etc. bringing discredit to science have now mostly disappeared from the scene with the appearance of KP. We correctly declare KP as an encyclopedia of Astro Science. Show we advise learn and earn through KP.
